Day of Clinical Research 2017
Institut für Pathologie, Hörsaal 7 (Langhans), Murtenstrasse 31, 3010 Bern,
31.10.2017, 14:10 - 17:15 Uhr
Inselspital

The Department for BioMedical Research (former Department of Clinical Research) provides the infrastructure and support for the clinical research of the Faculty of Medicine at the University of Bern. The annual “Day of Clinical Research” has established itself as a forum for researchers to present their work in a poster session and to get insights into the research projects of their colleagues.

Besides awarding the Johanna Dürmüller-Bol DBMR Research Award 2017, the Poster Prizes of the DBMR, the DBMR/CTU Best Clinical Mentoring Prize and the Research Prize Alumni MedBern, the DBMR organizes two keynote lectures. This year’s first lecture will be presented by Prof. Gary Koretzky, Vice Dean, Weill Cornell Medicine and Frank H.T. Rhodes Distinguished Professor of Cardiovascular Biology and Genetics, United States with the title “Insights into Hematopoietic Cell Development & Function through Targeted Mutation of an Adapter Protein”. Prof. Mark A. Rubin, Department for BioMedical Research, University of Bern, Switzerland will give the second lecture with the title “Precision Medicine: Mapping Switzerland”.

Program
