

Workshop on Wearables and Digital Biomarkers for Cardiovascular Diseases and Neuroscience

sitem-insel Bern, Felix Frey Auditorium, E0.211, 30.06.2022, 15:45 - 18:00 Uhr
InselSpital | Neurologie | Herz Gefäss Zentrum | Kardiologie

We invite you to join us for the Workshop on Wearables and Digital Biomarkers on 30 June 2022.

The collection of data related to the health of a person has been steadily advancing in the past years, generating new information and insights into the medical and biological state.

The healthcare industry connects data with a health-related outcomes, thus creating digital biomarkers. Medical research has recognized the potential of tracking data in a non-invasive way and the possibilities of not only using it for diagnostic but even therapeutic purposes.

We invited researchers from Universities and ETHs, industry partners and medical doctors to share their insight into the capabilities of wearable biomarkers today and how they may impact in the future.

Join us for a workshop featuring a trade fair in Bern!

Date

Thursday, 30 June 2022

Time

3.45 pm until 6 pm

Location

sitem-insel, Freiburgstrasse 3, Bern, Felix Frey Auditorium, E0.211

Registration
